dhananjaykumarverma088@gmail.com

Results-driven Full Stack Developer with 3+ years of experience designing and delivering scalable, microservices-based web and mobile applications using React.js, Next.js, React Native, Node.js, MongoDB, JavaScript (ES6+), and TypeScript. Strong expertise in RESTful API development, system architecture, performance optimization, and SEO-friendly responsive UI development. Experienced in integrating payment gateways, third-party services, and IoT solutions, with hands-on knowledge of authentication, CI/CD pipelines, and Agile methodologies to deliver secure, high-performance, production-ready applications in fast-paced environments.

Education

Full Stack Web Development, Masai School
03/2022 – 01/2023 | Bangalore, India

B.Tech in Computer Science,
Shri Venkateshwara University
08/2018 – 09/2022
Gajraula, Uttar Pradesh, India

Skills

Frontend : React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Tailwind CSS, Material UI, SvelteKit, SEO Optimization

Backend : Node.js, Express.js, RESTful APIs, API Design, Microservices, Authentication & Authorization (JWT), MVC Architecture

Database : MongoDB, MySQL, SQL

Mobile Development : React Native, Android Studio, Cross-Platform Development

AI & Developer Productivity: Generative AI, Prompt Engineering, LLM Integration (Basics), AI-assisted Development Tools: ChatGPT, Claude, Cursor

Cloud & Tools: AWS, Render, Vercel, Netlify, Git, GitHub, Postman, Jira

API & Testing Tools: Postman, JSON APIs, API Debugging & Integration

Other Skills : Salesforce, Java, Data Structures, Problem Solving, System Design, Agile Methodology, CI/CD, Performance Optimization

Awards

Rising Star Award

First Position in Project Presentation.

Professional Experience

Kazam EV Tech Pvt Ltd, Full Stack Developer

11/2024 – present | Bengaluru, India

Project: EV Infrastructure & Digital Ecosystem

(TNGCL Government Project & Kazam EV Platform)

Tech Stack: React.js, Next.js, React Native, Node.js, Express.js, MongoDB,

- Led end-to-end development of scalable web and mobile applications for a government EV infrastructure platform.
- Built a centralized Admin Dashboard to manage assets, users, workflows, and configurations.
- Architected a scalable EV Matchmaking System to optimize allocation between stakeholders and charging stations.
- Developed real-time Charger Management System (CMS) and Battery Swapping System to enhance monitoring, diagnostics, and fleet efficiency.
- Designed secure microservices-based RESTful APIs integrating payments, IoT telemetry, location tracking, and asset monitoring.
- Optimized mobile application performance and contributed to the Energy Management System (EMS) using Next.js.

ClearTax (Defmacro Software Pvt. Ltd), Application Engineer

10/2023 – 10/2024 | Bengaluru, India

Tech Stack: HTML5, CSS3, JavaScript, JSON APIs, Salesforce, Jira, Postman

- Utilized Postman to test, debug, and optimize JSON APIs, ensuring reliable performance and reducing API-related issues.
- Collaborated with cross-functional teams in an Agile environment to resolve production issues and improve system reliability.
- Managed client communications via email and calls, delivering timely technical support and improving customer satisfaction.
- Ensured accurate integration and compliance with GST, E-Invoicing, E-Way Bill, and HSN regulations across systems.
- Diagnosed and resolved production issues by identifying root causes, reducing system downtime and improving overall performance.

Kafka Ventures Private Limited, Web Developer

03/2023 – 09/2023 | Bangalore, India

Tech Stack: React Native, Expo, Native Modules, Android Studio

- Engineered real-time location tracking using GPS and API integrations, enhancing instructor oversight; system now utilized by 50+ field instructors across three states.
- Built deep linking functionality for seamless in-app navigation, increasing user engagement and productivity.
- Developed an intuitive and user-friendly mobile interface for teachers, enhancing usability and overall user experience.

Projects

Hospital Management System

GITHUB

- Developed a full-stack **Hospital Management System** using Next.js (frontend) and Node.js with Express (backend), following MVC architecture.
- Implemented secure authentication and **role-based access control (RBAC)** for Admin, Doctor, Patient, Receptionist, Distributor, and Pharmacy panels.
- Designed RESTful APIs for appointment booking, prescription management, billing, inventory tracking, and patient record management.
- Built a centralized Admin dashboard for user management, analytics, and system monitoring.
- Integrated MongoDB for efficient medical record storage and optimized query performance.
- Implemented an **AI-powered health advisory tool** within the admin panel to provide intelligent medical suggestions based on symptoms input.
- Ensured data security, scalability, and responsive UI for seamless multi-role operations.

FreshHarvest: Fresh Produce, Delivered! 🌿🍏

GITHUB

FreshHarvest delivers high-quality, organic, seasonal fruits and vegetables directly to your doorstep. All our produce is handpicked from trusted farms to ensure freshness and quality.

- Premium, farm-fresh produce delivered to your door.
- Wide selection of fresh fruits, vegetables, organic produce, and more.
- Order by 3 PM for same-day delivery.
- Free delivery on orders over \$50.
- We offer full refunds or replacements if you're not satisfied.
- Special seasonal discounts, including up to 20% off organic products & 24/7 customer support
